

### **Wichtiger Hinweis:**

Diese Farbtöne sind digital und deshalb nur Annäherungswerte für die gewünschten Putze und Farben. Je nach digitalem Medium und deren Auflösung sind extreme Farbtonunterschiede möglich. Dies gilt auch für die verschiedenen Drucker.

Eine Farbtongarantie kann daraus nicht abgeleitet werden! Für die perfekte Ansicht bestellen Sie sich am besten eine Original HAGA Farbmusterkarte.

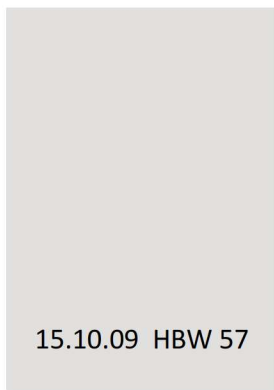

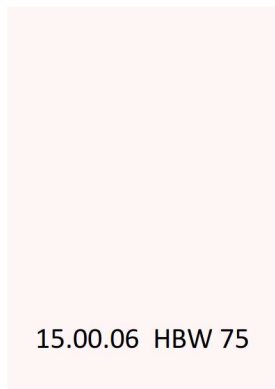

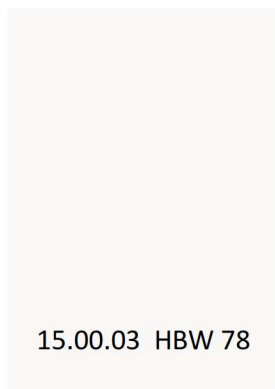

Nicht alle Farbtöne sind für Fassaden und Wärmedämm-Verbundsysteme geeignet. Erkundigen Sie sich vor Bestellung nach Eignung und nach Farbtonzuschlag.

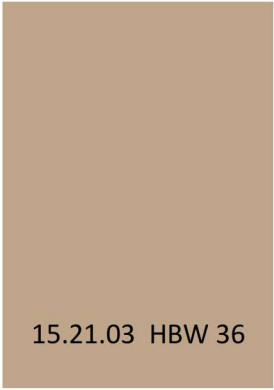

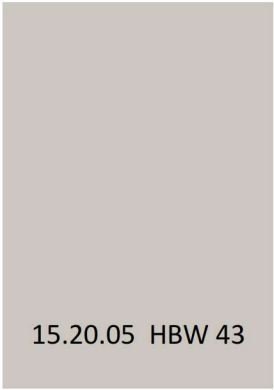

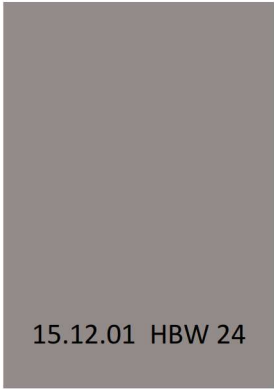

Auf Grund des unterschiedlichen Abbinde Prozesses von natürlich gebundenen Produkten, können wir für Farbtongenauigkeit und eventuell auftretende Fleckenbildung keine Gewährleistung übernehmen. Hinweise sind aus den technischen Merkblättern zu entnehmen.

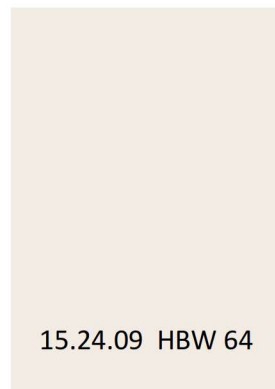

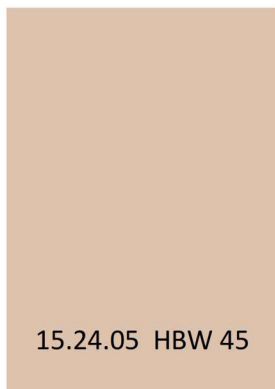

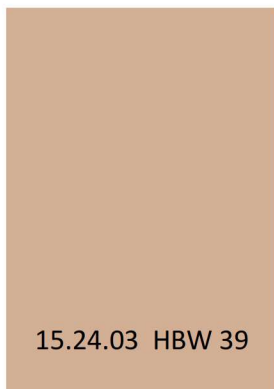

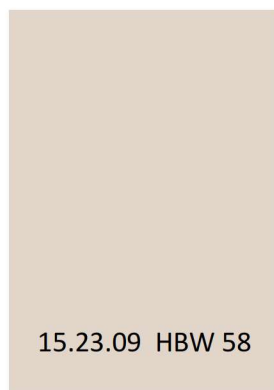

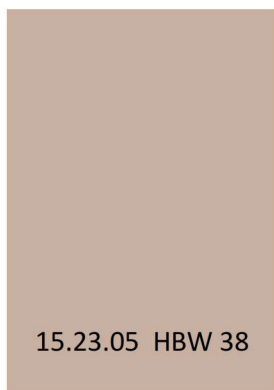

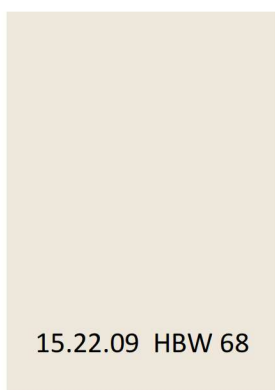

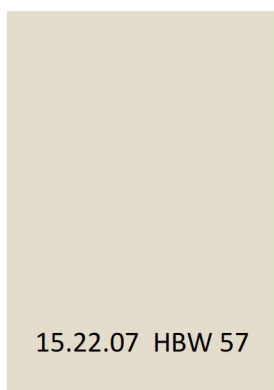

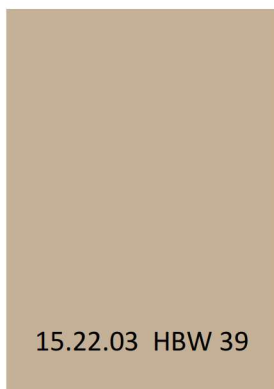

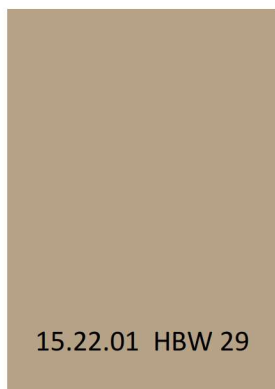

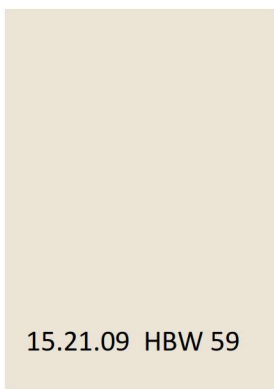

Vor der Verarbeitung ist mit Probeaufstrich zu prüfen, ob der gewählte Farbton mit Ausmischung übereinstimmt. Farbtonabweichungen die nach der Verarbeitung reklamiert werden, können wir nicht anerkennen.

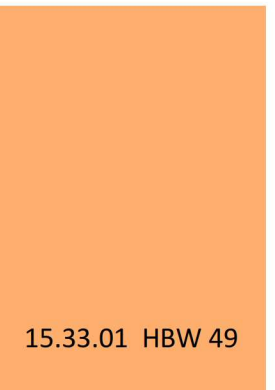

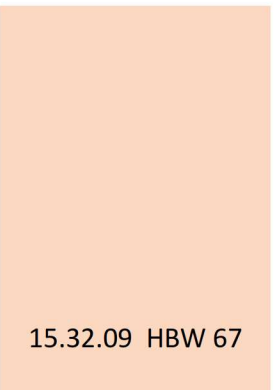

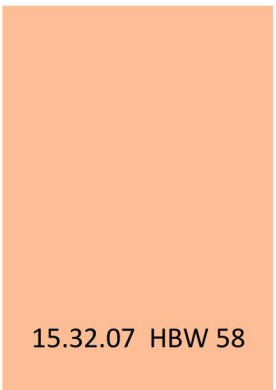

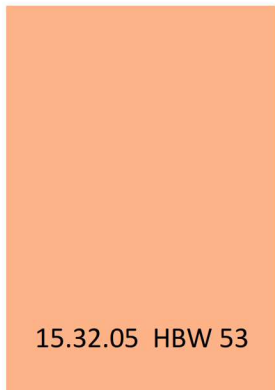

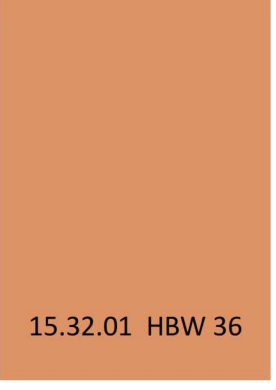

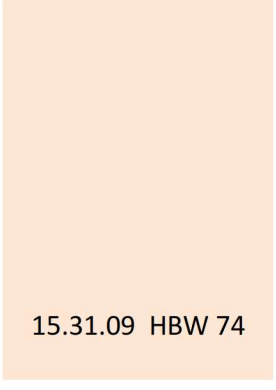

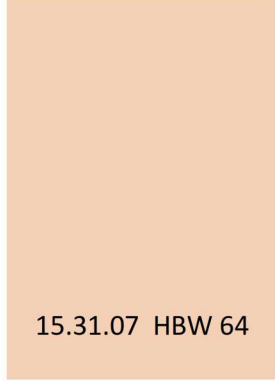

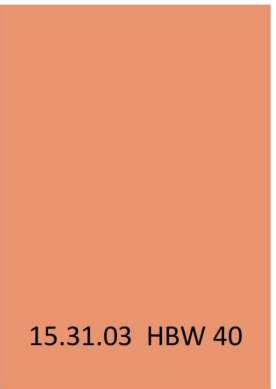

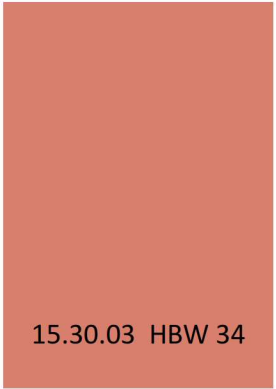

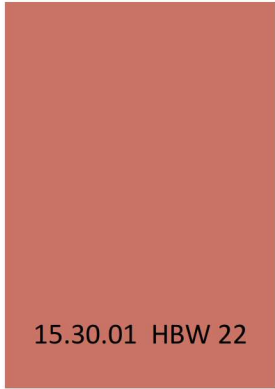

Bitte beachten Sie bei Farbtonvergleichen, dass Art, Struktur und Saugfähigkeit des Untergrundes und Lichtverhältnisse einen Farbton stark beeinflussen.

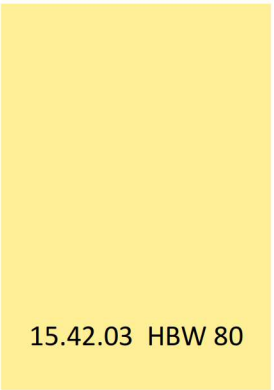

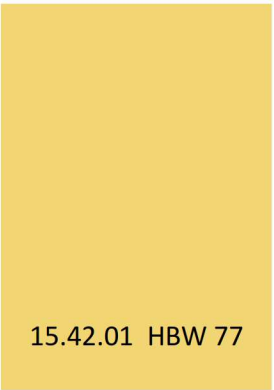

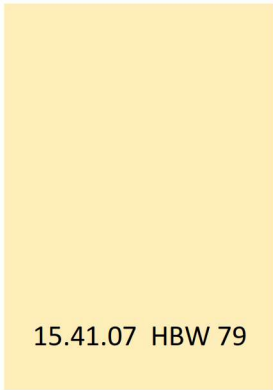

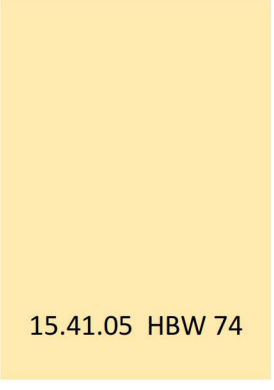

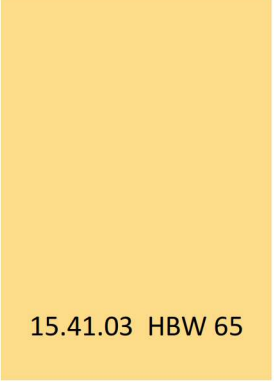

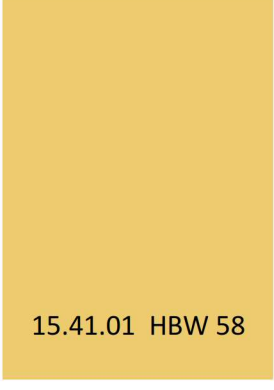

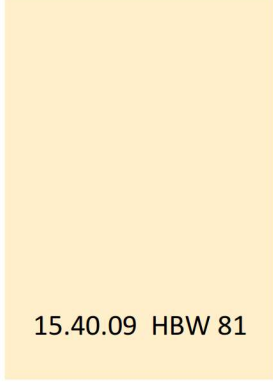

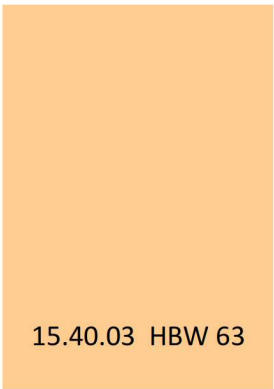

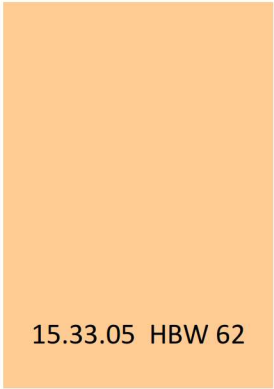

Nach diesen Farbtönen werden unsere Naturputze und Naturfarben abgetönt. Je nach Produkt, kann es zu unterschiedlichen Farbtönen kommen.
